

LEAVES NO REMNANTS.

SEPARATING AGENT

Emulsion concentrate to be mixed in water at a maximum ratio of 1:10

SEPARATING AGENT is based on natural vegetable oil and special emulsifiers. Good biodegradability in water and soil is ensured.

In its emulsified state it can be used especially as a parting agent for hot and mastic asphalt.

BITUSEP

Ready for use.

BITUSEP is a low-viscosity, highly biodegradable, bitumen release agent for pneumatic tyred rollers, pavers and feeders, truck loading beds and asphalt mixing plants with outstanding non-stick properties.

It reliably prevents the adhesion of bitumen and asphalt to surfaces, equipment and work materials.
